

DURAMAX

**EXTREME-DUTY
RECTANGULAR COLLECTORS
& CROSS COLLECTORS**

DESIGN UPGRADES AND RETROFITS

10-YEAR WARRANTY • 24/7/365 RELIABILITY • LOWEST LIFE-CYCLE COST

MAXIMUM STRENGTH. MAXIMUM CORROSION RESISTANCE. MAXIMUM ABRASION RESISTANCE.

SOLUTIONS FOR TODAY, TOMORROW AND THE NEXT GENERATION.

Need an economical, cost saving solution for your Headworks and Stormwater equipment? DuraMax Rectangular Collectors & Cross Collectors are today's newest and best available technology for heavy solids removal and sludge collection.

DuraMax Rectangular Collectors are the result of over three decades of applied field research and materials testing, and utilize the first CAST STAINLESS STEEL CHAINS ever manufactured for the Water and Wastewater Industry. DuraMax Chains are precision cast from aerospace-grade alloys specifically designed for extra heavy-duty, corrosive and abrasive Rectangular Collector applications.

DuraMax Rectangular Collectors are designed to provide 20-years of reliable, continuous duty service without major component repair or replacement. Routine life-cycle maintenance costs are substantially reduced, and less than all other rectangular collector designs.

When evaluated over a 20-year design cycle, DuraMax Rectangular Collectors and Cross Collectors provide the lowest life-cycle cost, and maximum equipment value.
